MonkeyDog's Sound Detective sheet

Three sound mysteries to try at home or in class, from MonkeyDog's Sound Mysteries. Ages 4–8, with a grown-up.

1. The humming mystery. Hand on your chest, hum, then stop.

Tick: ☐ I felt a buzz

☐ The buzz stopped when I stopped.

2. The shell mystery. Try a shell or cup, then a cupped hand. Draw which whoosh was loudest.

3. The jumping rice mystery. Bang hard, then softly. Draw the rice each time.

For grown-ups: Hold shells near the ear, never in it. Bang near the bowl, away from ears. Keep small grains away from very young children.

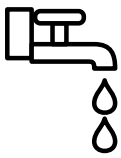

Sound is made by vibrations. Science checked by Evolution Of You. Made by humans, with AI tools.

MonkeyDog's sound hunt

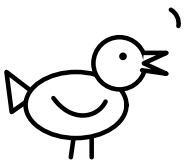

What sounds can you hear at home? Tick each one you find, with a grown-up.

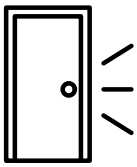

a clock ticking ☐

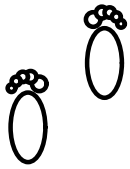

water from a tap ☐

a bird ☐
